Projects

Rock paper scissors game

Github Repo 

This game was created from scratch with React. I used mainly state to make out the logic of the application. Generally, it was an easy project to pull off and I hope you enjoy playing as much as I enjoyed creating it.

Food order app

Github Repo 

This food order application was built from scratch with react. This application provides a smooth and friendly UI for making orders and viewing the menu of a restaurant. React hooks such as useEffect, useContext, useReducer and useState were used to make out the functionalities of the application.

Calculator App

Github Repo 

This calculator app was built from scratch with react and provides a smooth UI and multiple features such as addition, subtraction, multiplication, division and modulus function for its user.
